

20 WAYS TO GREEN YOUR LIFEGUARD UNIT AND SUPPORT CENTRE

This diagram shows ways you can help to improve the RNLI's environmental impacts at its lifeguard units and support centres. Improving our impacts helps us to comply with legislation, safeguard our environment, reduce our costs, meet our environmental ambitions and protect our reputation. Select the numbers to find more information and guidance about each topic on Horizon.

- | | | | | | | | |
|---|-------------------------------|----|------------------------------------|----|--------------------------------|----|-------------------------------------|
| 1 | Lifeguard waste and recycling | 6 | Materials and hazardous substances | 11 | Insulation and building fabric | 16 | Wash down |
| 2 | Secure waste storage | 7 | Refuelling | 12 | Windows and doors | 17 | Ground and water source heat pumps |
| 3 | Hazardous waste | 8 | Energy monitoring | 13 | Solar Photovoltaics (PV) | 18 | Spill kits and pollution prevention |
| 4 | Oil and lubricant storage | 9 | Lighting | 14 | Water in and out | 19 | Around your lifeguard buildings |
| 5 | Fuel storage | 10 | Heating and cooling | 15 | Sinks, toilets and showers | 20 | Marine reserves and the sea |
